Summary

I am a Full Stack Web Developer with 4+ years of experience in building websites and web applications. I mainly work on the backend using PHP, Laravel, and MySQL, and also handle frontend tasks using HTML, CSS, JavaScript, and jQuery when needed. I focus on writing clean and reusable code, and I always try to improve website speed by optimizing database queries. I have worked with APIs, added AI tools like ChatGPT and Gemini, and delivered real world projects like MasteryMade.com, Pluckit.com, and TheCompellingImage.com. My goal is to build fast, reliable, and maintainable web systems.
